Powder Metal Conversions

In the past decade the Powder Metal Industry has developed materials that rival the properties of forged, cast iron or screw machine. Powder Metal provides equal or better strength for a lower price and with consistently higher quality. Powder Metal parts can be easily produced at volumes of a few hundred to a few million pieces.

When Vision Quality Components gets challenged with a conversion we discuss with our customer whether it is suitable for the PM process. Once determined that it is a candidate, we analyze the material, geometry, tolerances, process options and if it is a cost savings.

Please contact Vision Quality for any potential conversions. We may be able to provide you with the same parts you are currently getting from a different process – but stronger, greener and for a lot less.

Vision Quality Components has joined the American Gear Manufacturers Association (AGMA). This decision was made to enhance our already large market in the gear industry. AGMA has helped set national gearing standards since 1916. AGMA standards address nearly all the critical areas of gear manufacturing. Our engineering staff will be attending the Gear Expo in October. We are excited to be a member of AGMA and look forward to the information and assistance they provide to gear manufacturers. AGMA is an invaluable resource for a leading gear manufacturer like Vision Quality to ensure our gears exceed our customers' requirements.

Performance Metrics

On Time Delivery Performance

Vision is proud to report our 3rd QTR 2015 on-time delivery performance of 100%. Vision has shipped the last seven months in a row at 100%.

We believe this is critical to supplier-vendor relationship. We will continue to strive to meet the demands of all our customers.

Survey Results

Surveys are sent out each quarter to our customers asking how we are performing as a vendor. This feedback is valuable to us and we thank you for completing and returning this information. The 3RD QTR results show that Vision's customer satisfaction is exceptional with no issues or concerns from our customers.

New Information Video Posted to YouTube

We have just made available on our website and YouTube a new video demonstrating our abilities at Vision Quality Components.

Made in the USA

We are very proud that all our products are made in the USA.

Company Picnic

In August we held a catered company picnic that was well attended. Employees and family members had a chance to go waterskiing and tubing. Many just stayed on land and played horseshoes and corn hole. We appreciate all the hard work our employees contribute to make Vision QCI so successful.

HAPPY FALL!

Your

Denny, Bob, Fred, Matt, Linda and Lesley

Please contact Lesley Kline if you have any questions at 814-765-1903 or email lkline@visionqci.com.
